PROFESSIONAL SUMMARY

Motivated and detail-oriented MCA (AI & ML) student with a strong foundation in Python, Java, and data structures. Passionate about building intelligent systems and solving real-world problems using machine learning and data analysis. Skilled in developing predictive models, data preprocessing, and visualization, with hands-on project experience.

EDUCATION

Master of Computer Applications (AI & ML)

Galgotias University (2024 – 2026)

CGPA: 7.79

Bachelor of Science

CCSU (2021 – 2024)

CGPA: 6.39

Intermediate (12th)

St. Aerjay Public School (2021) – 75.5%

High School (10th)

St. Aerjay Public School (2019) – 82.6%

WORK EXPERIENCE

Data Science – CodSoft

Nov 2025 – Dec 2025

- Developed a movie rating prediction model using Python and TensorFlow to improve recommendation accuracy
- Built a Titanic survival prediction system by performing data cleaning, feature engineering, and model training
- Implemented Iris flower classification model achieving high accuracy using supervised learning techniques
- Conducted data preprocessing and visualization to extract insights and enhance model performance

ACADEMIC PROJECTS

Mental Health Prediction & Mood Analysis using AI

- Designed and developed a machine learning model achieving 96.3% accuracy in predicting mental health conditions
- Applied multiple algorithms including Logistic Regression, Decision Tree, Random Forest, SVM, KNN, and XGBoost
- Performed data preprocessing, feature selection, and evaluation to optimize model performance

Technical Skills

Programming: Python, Java, C

Libraries: NumPy, Pandas, Scikit-learn

Tools: SQL, VS Code, Git, GitHub, Power BI

Core Concepts: Data Structures, OOP, Design and Analysis of Algorithm, Machine Learning, NLP, EDA
